

JETTER MACHINE PRODUCT GUIDE

**At Vac•Con we develop
products that clean and
dig smarter through
innovative design
and manufacturing**

WELCOME

At Vac•Con, we care deeply about the protection of the environment and our communities. That's one reason we build the equipment that we do.

Our machines assist public and private entities in maintaining collection systems and treatments facilities, flood remediation and prevention, and non-destructive excavation. With proper maintenance and training, Vac•Con machines help protect the world's potable water supply and other important resources for future generations.

At Vac•Con, we aim to increase our customers' efficiencies and cost-savings by providing machine solutions that bring value to the job site... and the bottom line.

Vac•Con has been making a positive impact on communities and environments around the world for over four decades.

Vac•Con rises above the competition for the following reasons:

Tailored Innovation – Vac•Con has a reputation of innovation that is cultivated by a mission to exceed customer expectations. We’ve developed many firsts in the industry such as the dual engine machine, 3-stage fan, hydrostatic drive systems, hi-dump, Omnibus Precision Power, the articulating hose reel, plastic water tanks, the Aeroboost Fan, and the Precision Reel Operation (PRO) hose reel. We are committed to introducing new and improved products each year to better improve operator ergonomics, machine performance, and overall aesthetics.

Delivery – Vac•Con is known for the ability to build and turn a machine around faster than any other competitor. When a customer has a rush order or needs a unit by a certain date, Vac•Con will have ‘wheels on the ground’ before or by that date. We can meet these deadlines due to exceptional relationships with vendors and suppliers as well as a plentiful stock of pool chassis available on-site at the manufacturing facility.

Support – From engineering, sales, parts, and technical service, once a Vac•Con customer, always a Vac•Con customer. Our teams provide personal, unparalleled product and sales support with expert knowledge from the field and the manufacturing facility. In addition, Vac•Con is supported by a worldwide network of dealers that provide front line parts, service, and sales support daily.

Product Offering – Vac•Con offers a complete portfolio of combination, hydro-excavation, and jetter equipment in truck, trailer, and skid-mounted configurations. We boast one of the most comprehensive offerings on the market and continue to evolve and add products each year to meet customer needs and fill product gaps.

Experienced – Vac•Con started in 1986 with 12 employees and a network of representatives in the sewer and wastewater industry. We’re proud of our roots and the people that have grown us to where we are today.

From engineering, sales, parts, and technical service, once a Vac•Con customer, always a Vac•Con customer.

100% Employee-Owned – Vac•Con employees have ownership in the operation, ensuring a culture of accountability and quality that can be seen in every unit. Our jobs are more than just a paycheck – they are an investment in our future, and we strive to be the best in the industry.

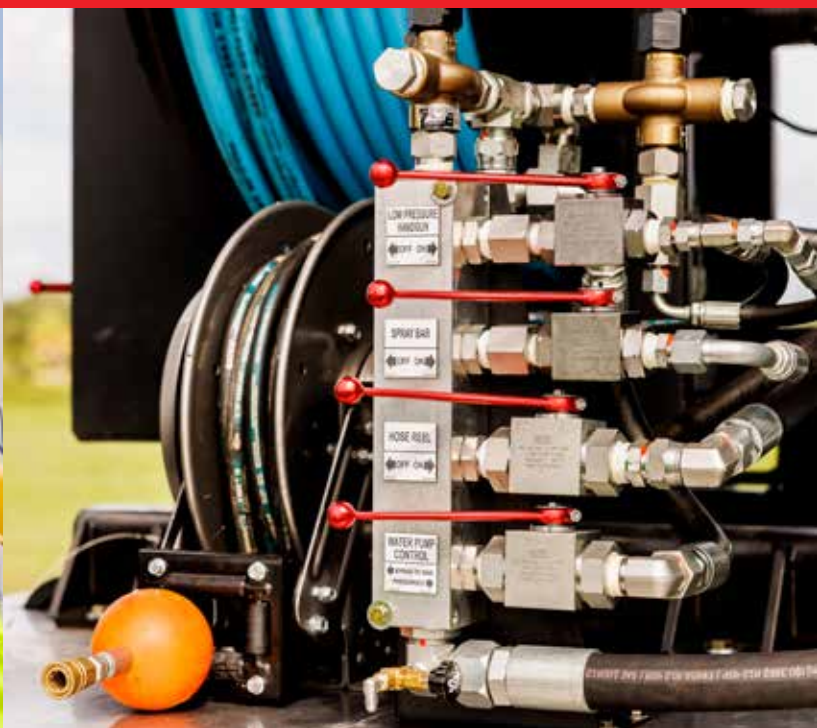

VJT1500

An enclosed jetter truck offering simple operation and the most accessibility on the market.

This unit offers simple operation and the most accessibility on the market with 6-ft. wide door openings on three sides. Operator ergonomics are at the forefront of this machine with a height adjustable control panel to suit all operators. The hose reel on the VJT1500 can be used outside of the enclosure even with the doors closed to keep your water system protected during extreme weather.

Cold or hot, rain or shine, the VJT1500 is an operator's go-to for pipeline cleaning and jetting.

- More standard features included than any unit on the market
- Easy to operate

VJT750

The VJT750 is a jetter system mounted onto a portable truck chassis.

This unit features a simple design and operation so operators of all skill levels can master the art of jetting. A low-profile configuration offers greater safety and the structural steel frame provides one of the strongest trailers on the market.

The VJT750 can be relied upon to get to the job quickly and provide the performance and power expected from Vac•Con machines.

- Simple design and operation
- Truck footprint making it easy to access area others are too big for
- Cold weather recirculation and air purge system
- No CDL required to operate

VJT-V

A powerful chassis mounted jetter system with the ability to vacuum.

The VJT-V is hard to define. Is it a jetter? Is it a combination machine? Is it a hydro excavation machine? Yes. Cleaning a line and come across something that's blocking your ability to clean? No problem, you can easily vacuum it up and keep on going. With the VJT-V operators have a product that can handle a variety of functions all in one package.

- 600 or 750 gallon options available
- Twin 75 gallon debris tanks
- Sewer jetting
- Vacuum capabilities
- Quick unit for emergency blockages
- Wireless remote available
- No CDL required to operate

HOT SHOT

The Hot Shot is a powerful yet versatile machine that offers superior high-pressure flushing action to clear all types of debris.

The Hot Shot's superior high-pressure flushing action gives the added power needed to clear stones, bottles, cans, grease, sludge, and other stagnant debris from sanitary sewer and/or storm drain lines. Like all tough Vac•Con machines, Hot Shots are equipped with a non-corroding, polyethylene water tank and all the controls to do the job right are located at the hose reel operator station.

- Sewer jetting
- Spill dilution and clean-up
- Pipeline maintenance and prevention
- Quick unit for emergency blockages

VJ SERIES

The VJ Series of products are designed to take on the toughest sewer lines, storm drains, and catch basins in a portable trailer-mounted configuration.

The Jetter Series low-profile design features the same power Vac•Con combination units are known for. Applications include sewer line, storm drain, and catch basin jetting as well as spill dilution and clean-up.

Available in either a 375-gallon or 750-gallon water tank configuration, operators will find our trailer offerings not only an economical option, but powerful and productive as well.

- Low profile
- Multiple fresh water capacities
- Cold weather recirculation and air purge system

JETTER SPECIFICATIONS

At Vac•Con we pride ourselves on building mahcines that are custom built to fit the needs of our customers. As a result, Vac•Con wins out on value, performance, and reliability every single time.

VJT1500 <i>Enclosed Jetter Truck</i>						
Axle Setup	Drive System	Water Capacity / Pump	Hose Reel Type / Location	Wireless Remote	Dimensions Height / Length	Additional Options
Single or Tandem	Hydrostatic	1,500 or 3,000 Gallons — 30–80 GPM Up to 3,000 PSI	Articulating — Rear	Available	Max Height: 11' 5" — Max Length: 29' 5"	Street flushing package, Heated enclosure, Winter recirculation, Retractable awning, Safety lighting package, Safety camera package, Lateral line kit, Anti-freeze water pump system, Additional low-pressure hand gun hose reel, Cone rack storage

VJT750 <i>Jetter Truck</i>						
Axle Setup	Auxiliary Engine	Water Capacity / Pump	Hose Reel Type / Location	Wireless Remote	Dimensions Height / Length	Additional Options
Single	Diesel	750 Gallons — 18–40 GPM 2,000–4,000 PSI	Rotating — Rear	Available	Max Height: 8' — Max Length: 26'	Safety lighting package, Safety camera package, Anti-freeze water pump system, Winter recirculation, Lateral line kit, Diamond plate package, Additional hand gun hose reel, Cone rack storage

VJT-V <i>Jetter and Vacuum Truck</i>									
Axle Setup	Auxiliary Engine	Hose Reel Type / Location	Vacuum Type / Drive	Filtration Type	Debris Capacity	Water Capacity / Pump	Wireless Remote	Dimensions Height / Length	Additional Options
Single	Diesel or Gas	Rotating — Rear	PD Blower — Auxiliary Engine	Cyclonic Separator — PD Blowers Include Final Filter	150 (Gallons)	375–750 Gallons — Up to 30 GPM Up to 4,000 PSI	Available	Max Height: 11' 5" — Max Length: 25'	Street flushing package, Safety lighting package, Safety camera package, Anti-freeze water pump system, Winter recirculation, Lateral line kit, Debris tank flush out, Additional hand gun hose reel

Hot Shot <i>Jetter Truck</i>						
Axle Setup	Drive System	Water Capacity / Pump	Hose Reel Type / Location	Wireless Remote	Dimensions Height / Length	Additional Options
Single or Tandem	Hydraulic	Up to 2,500 Gallons — 30–80 GPM Up to 3,000 PSI	Articulating — Front	Available	Max Height: 11' 5" — Max Length: 38'	Safety lighting package, Safety camera package, Anti-freeze water pump system, Winter recirculation, Lateral line kit, Diamond plate package, Additional hand gun hose reel, Cone rack storage

VJ Series <i>Jet Trailer</i>						
Axle Setup	Auxiliary Engine	Water Capacity / Pump	Hose Reel Type / Location	Wireless Remote	Dimensions Height / Length	Additional Options
Single or Tandem	Diesel or Gas	375 or 750 Gallons — 18–40 GPM Up to 4,000 PSI	Rotating — Rear	Available	Max Height: 8' — Max Length: 26'	Dual hose reel setup, Safety lighting package, Anti-freeze water pump system, Winter recirculation, Lateral line kit, Cone rack storage

ADDITIONAL INFORMATION

Water Options

Water Capacities – Vac•Con offers users a range of water tank capacities to best fit their applications and job requirements. Water capacity may change the overall configuration of a unit, including going from a single to tandem axle.

Hose Reel Options

Articulating Hose Reel – The articulating hose reel is an industry standard developed by Vac•Con. 180-degrees of rotation towards the driver's side provides flexibility at the manhole. The reel is supported by a hydraulically operated outrigger leg and is a tried-and-true hose reel system.

Operator Focused

Operation – We know a machine is idle without an operator. For this reason, we prioritize improving operator efficiencies and ease-of-use across all our product lines. We're proud to be the innovators of some of the most user-friendly components on the market.

Built to Your Needs

Custom Comes Standard – At Vac•Con we have over 40 years of experience in designing, manufacturing, and supporting combination, hydro-excavation, and jetter machinery. We work with our customers as consultants, helping you determine what machine will best suite your needs. With Vac•Con you will not be picking your next truck off the lot or compromising by picking from a few existing models... Your Vac•Con will be custom built just for you.

Plus, we are continuously innovating new solutions for our customers in an effort to provide them with a complete offering of reliable, high-performing products.

When it comes to the best environmental machinery solutions for any application, there is no comparison to Vac•Con.

As the proven experts in the industry since 1986, our product offering has been carefully designed, engineered, built, and tested to exceed expectations and bring value to our customers.

Not only do we build the best machines in the market, we provide unparalleled customer support for our equipment leading to lifelong relationships.

Once a Vac•Con customer, always a Vac•Con customer.

A WORLDWIDE NETWORK OF DEALERS

While we build the best machines in the industry, our dealers build the best support network in the field. Our global, full-product-line network of dealerships has the expertise to guide you through any buying or servicing scenario... Wherever your work leads you, you are never far from a Vac•Con expert!
